Bill Gates' dark dream of blocking sunlight from the Earth is about to be realized

"And that You should reward Your servants the prophets and the saints, And those who fear Your name, small and great, And should destroy those who destroy the Earth." -Rev. 11:18

Bill Gates' insane plan to "save the planet" from so-called climate change by partially blocking out the sun has officially been launched.

Gates, ever the demented snake oil salesman, has long argued in favor of a bizarre plan to fight global warming using experimental geoengineering to *block the sun's rays from reaching Earth*.

Well, he's apparently about to get his wish.

Scientists plan to begin pumping chemicals into the sky over the next few weeks and months from several countries around the globe, including in the United States, Australia and Israel, reports *Slay News*.

The idea, **promoted by** Gates and leftist billionaire **George Soros**, involves pumping manmade white clouds containing chalk dust and other chemicals into the atmosphere to reflect sunlight away from the Earth's surface.

Blocking the sun's light would allegedly lower the planet's temperature enough to reverse global warming.

Never mind that fruit trees and vegetables require sunlight in order to grow and produce food for the masses. Not to mention, sunlight is the primary source of critical Vitamin D, an essential nutrient for human immunity. Gates, a known eugenicist who goes around giving talks about how we need to reduce the global population, likely sees these dark possibilities as exciting side effects of the nefarious sun-blocking plan.

It's been going on for ages, and as much of the weather worldwide is Sun driven via evaporation and convection, by choosing where to block the Sun, you can control weather. Mr Gates bless him, could do with a Patriot missile inserted up him.

Be better with a Kinzhal Ian, more likely to work than a Patriot 🤔
